LANGUAGES: ✓ **Polish:** Native ✓ **English:** C1 (Business) ✓ **German:** A2

PROFESSIONAL SUMMARY

Master's student in Management and Production Engineering bridging technical expertise (Python, SQL) with a strong understanding of business processes and financial data. Experienced in implementing AI-driven tools (LLMs) to automate workflows and optimize operational decision-making. Strong communicator with a proven track record in presentations and stakeholder engagement, seeking to leverage analytical skills to build innovative AI solutions in consulting.

EDUCATION

Master of Engineering - Management and Production Engineering **2025-present**
Warsaw University of Technology, Warsaw, Poland

EPAM Data Analytics Engineering Mentoring Program **2026-present**
EPAM Systems

- Program covering: SQL for Data Analytics, Database Concepts, Database Structure, PostgreSQL, SQL, PostgreSQL PL/pgSQL, PostgreSQL SQL, PostgreSQL DB Development.

Bachelor of Science in Mechanical Engineering **2020-2025**
University of Twente, Enschede, Netherlands

- Bachelor's thesis: "Evaluation of the Energy Potential of Offshore Wind Farms at the Coast of Greece".
- Technical and economic analysis of energy production systems, including costs, market conditions, and regulatory aspects.
- Research project: "Unlocking Offshore Wind Potential in Greece & Italy. A Socio-Technical Assessment", covering stakeholder analysis, implementation barriers, and institutional context.

Bachelor of Science in Mechanical Engineering (Erasmus Exchange) **2022-2023**
Royal Institute of Technology (KTH), Stockholm, Sweden

- Selected courses: Machine Design, Product Modularization, CAD and IT Tools in Industry.
- Collaboration in international project teams and task execution in English.

CS50's Introduction to Databases with SQL **2025**
CS50's Introduction to Programming with Python **2025**
Harvard University

PROJECTS

CRM System & Relational Database Design and Implementation - Google Sheets, SQL, Apps Script

- Engineered a relational database and CRM system, actively utilizing AI tools (ChatGPT, Claude, Gemini) to automate business workflows, significantly reducing manual reporting and offer preparation time.
- Designed and implemented a system supporting customer management, order tracking, and work scheduling in a manufacturing service company.
- Automated operational and managerial reports as well as core business processes using scripts and AI-assisted tooling.
- Improved organizational efficiency by reducing client handling time and proposal preparation effort.

Energy Systems Analysis & Optimization - MATLAB

- Developed complex computational models in MATLAB to analyze large-scale, multi-variable datasets (e.g., ERA5 wind fields), applying statistical concepts to optimize costs and visualize performance metrics.
- Modeled and compared energy production system variants using technical and economic data.
- Conducted cost-effectiveness analysis and operational evaluation of a geothermal-solar installation.

Production System Planning & Analysis for a Buggy Vehicle Factory - visTABLE

- Conceptual factory design with analysis of material flows, machine working times, and operational costs; development of production and auxiliary space layouts.

SKILLS

Core Consulting Skills

- Business-Technical Communication, Analytical Problem-Solving, Financial Data Analysis.
- Presentation Skills (PowerPoint), Documentation, Stakeholder Engagement.

AI & Data Science

- Artificial Intelligence (AI) / LLMs: ChatGPT, Gemini, Claude (Claude Code).
- Data Analytics, Exploratory Data Analysis (EDA), Statistical Modeling, Process Automation.
- Machine Learning concepts (familiar): Tree-based Models (Decision Trees, Random Forests, Gradient Boosting), MLflow, Databricks.

Tech Stack

- Python (Pandas, NumPy), SQL, MySQL, PostgreSQL, Relational Databases, Data Extraction.
- Google Apps Script, JavaScript, C/C++, MATLAB/Simulink, Git, GitHub.

Data Visualization & Tools

- Matplotlib, Excel, Google Sheets, MATLAB.
- Other: LaTeX, WordPress, HTML, PowerPoint, Windows, macOS.

WORK EXPERIENCE

Junior Analyst Intern **04.2026 - present**
Sollers Consulting, Warszawa

Junior Automation Developer **2024-2026**
Metalpasja, Zagnańsk

- Streamlined operational and financial data pipelines to provide data-driven insights, supporting managerial decision-making and bridging the gap between technical execution and business needs.
- Designed and implemented tools automating reporting, scheduling, and order management processes.
- Debugged, optimized, and documented scripts and data structures; trained team members on automation tools.
- Collaborated with the company owner to design scalable automation processes.

Student Ambassador & Social Media Designer **2022-2023**
Poland 2.0 & Polish Society Netherlands

- Designed and delivered presentations, promotional materials, and webinars in an international environment, demonstrating proficiency in PowerPoint and strong business-technical communication skills.
- Organized networking and educational events; managed social media communication.

INTERESTS

- **AI & Data:** Development of AI tools and agents supporting decision-making; data engineering and process automation.
- **Finance & Business:** Finance and investing, market and risk analysis, operations management, economics.
- **Engineering & Technology:** Production systems, CAD design, emerging technologies, Formula 1.
- **Education:** Teaching, tutoring, and sport and physical activity.

VOLUNTEERING

- Erasmus+ youth exchange, Malaga (2019).
- School exchange program with Barcelona (2018).
- WOŚP charity volunteer (2018, 2019).
- Organization and co-organization of charity fundraisers and local events.
- Volunteer at international sporting events (FIFA U-20 World Cup 2017, IHF Women's U-18 World Championship 2018).
- Online tutoring in mathematics and physics; development of original didactic materials.
